Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 25-27 and 30-34 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 25 limits the invention by the language "consisting essentially of" but confuses the meaning and intents of the claims by reciting elements which would be excluded by this terminology. Accordingly, it can not be determined what elements are to be included and/or excluded by this terminology.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 9, 20-23, 25-29, and 31-34 are rejected under 35 U.S.C. 102(b) as being anticipated by Doerge (4,960,804).

Doerge discloses preparations of closed-cell rigid polyurethane foams having suitable properties and dimensional integrity and having densities encompassing of applicants' claims which are prepared by mixing and reacting isocyanates, polyols, and blowing agents wherein blowing agent combinations encompassing of applicants' claimed blowing agent mixtures are employed and polyols having hydroxyl values encompassing of applicants' claimed hydroxyl values are employed (see column 1 line 54 – column 2 line 31 and the examples, as well as, the entire document).

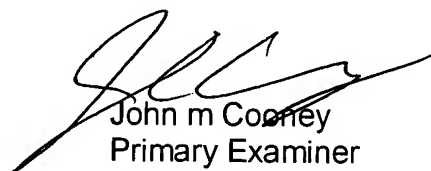

Claims 1-5, 9-14, and 16-34 are rejected under 35 U.S.C. 102(b) as being anticipated by Scherzer et al.(6,031,013)

Scherzer et al. discloses preparations of closed-cell rigid polyurethane foams having suitable properties and dimensional integrity and having densities encompassing of applicants' claims which are prepared by mixing and reacting isocyanates, polyols, and blowing agents wherein blowing agent combinations encompassing of applicants' claimed blowing agent mixtures are employed and polyols having hydroxyl values encompassing of applicants' claimed hydroxyl values are employed (see column 3 lines 51–65, column 6 line 58 – column 7 line 29, and the examples, as well as, the entire document).
